

# TALKING POINTS

An AI assistant that provides instant, verified answers to visitors in any language, while capturing insights for your team.

the problems

Repetitive questions!

Boring brochures!

No engagement!

No lessons learned!

the answer

Install a Talking Point and visitors get **immediate answers**, while you get **real-time data**.

What can a Talking Point provide for **your** organization?

Efficiency

Free up your team to focus on high-value hospitality while the AI handles the “where,” “when,” and “how.”

Intuitive engagement

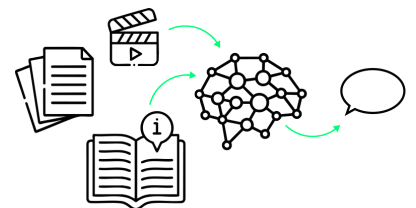

Enhance the visitor experience with context-aware and lifelike **conversational AI & video** to address their needs.

Accessibility

Communicates in visitors' native language, ensuring accessibility for international guests, with **subtitled audio**.

Verified knowledge

Talking Points only uses your **approved content**, ensuring accuracy and brand safety.

When it doesn't know the answer, it refers the visitor to person to staff instead of making something up.

## How does a Talking Point **work**?

- 1. Content**  
Gather your existing brochures, PDFs, and website data and upload it on our secure platform.
- 2. Deployment**  
Place your "Talking Point" kiosk or console strategically in your venue.
- 3. Interaction**  
Visitors press a button and talk. The AI responds instantly with personality and context.
- 4. Insights**  
Every conversation is logged and analyzed (anonymously) to provide actionable visitor feedback.

### More selling points!

- Available 24/7**  
An assistant that never gets tired and never misses a detail.
- Automatic reporting**  
Receive instant summaries of what visitors are asking and how they feel about your venue and service.
- Flexible hardware**  
Available as standalone kiosks, wall-mounted consoles, or integrated into existing displays.
- Custom personality**  
Tailor the AI's voice and personality to match your brand.
